— **TRADE IN CHICAGO.**—The removal of the hog-daily deliveries was the important thing today. A surprising and disappointing visible supply was the important thing.

The deliveries of cash wheat were in line predicted, possibly 2,000,000 bushels. Property was taken and paid for by the trade expected, the Cudahys. Just as help during the delivery hour reached principal Cudahy broker, they stopped, and where it left off on Saturday, showed one time of almost a cent, and closed the opening. About noon the visible amount showed an increase of 158,000 bushels for a week has been counting on a million. The figures at once fell, and within a short time al-

of the early advance was lost. There was such skepticism of the correctness of the market. In spite of the discount to pick up again, and at the close the early advance regained. July sold at 31 1/4 and 31 1/4, and closed at 74 5/8. May was from 3 to 3 1/4 cents under and narrowing toward the close. September at about 2 cents over July. Corn on the theory that the drought abroad reduces their fodder and pastures, and increases big exports of corn. May sold at 42 and 42, and closed at 42 cents, seller, and 42 1/4, buyer. Deliveries did not ex-

hels, although there were about 300,-  
bushels corn here. Oats advanced 12  
cents to the top, May selling between 28 3/4  
and 29 1/2, between 29 and 29 3/8 cents.  
The weather was really the factor. Delivered  
at 200,000 bushels. Prices opened strong  
except—only 12,000. The estimate for  
25,000. On this news from the yards  
45 cents a barrel, lard 15 cents a hun-  
dred to 20 cents a hundred. The close  
from the best prices. Provision  
1 show pork, regular, 75.527 barrels;  
lard, 9,403 hives; short ribs, 7,228,000

**METAL MARKETS.**  
**IRON.**—Market quiet, at New-York; prices Philadelphia market is reported as follows: The trade is unsettled, with very little business except on close terms. No one is trying much stock, and the general feeling they have got, unless for delivery to first-  
**PIG IRON.**—Good irons are scarce, so difficulty in maintaining prices. Inferior irons are to sell, low prices would have to be obtained can be realized for anything that is  
 but beyond that the market cannot be  
**RAILS.**—There is more inquiry, and sev-

made at £222 50 to £222 75 for 6 b. cars sold on a fair supply, however, and in some instances could be shaded by a prompt buyer. There is not much inquiry, and a little is seen at some of the Western steel mills, but £24 is about all that can be offered, and even then for limited quantities. The market seems inclined to postpone anything but a postponed sale. **FINISHED MATERIAL**—Prices unchanged. Mills moderately well supplied with orders, but not much new work is being done. The market is not in want of any of the right kind of material that happens to bring fair prices, otherwise it is hard to get. Glasgow, May 2.—Scotch wire. 1. Middleboro, May 2.—No 3 foundry
